

Year 12 Summer Homework

As part of your course you are expected to program using the python programming language. To prepare yourself for this course you will need to complete the interactive tutorials provided on this website:

<https://www.learnpython.org/>

It is essential that you provide evidence of this completed. Therefore it will be expected of you to provide a word document containing a log (like a diary) of the tutorials you do (it is expected that you attempt all of the tutorials) and on what day. With this log you need to include:

- Date
- What you have learnt
- A copy of your code (this can be a screen shot)
- A copy of your code executed (evidence showing what happens when you test to see if it works)
