

## FOCUS ON AFRICA

### Climate Change:

Note x3 examples with evidence of the impacts of CC on the continent. Ref individual countries

### New sources of energy:

Research the types of energy that you think best a chosen country and why

### Migration:

Explain, giving examples how migration impacts x3 chosen African nations. This can be inward and outward

To get a good grade in A level Geography it is essential to use relevant and topical case studies in the exam. At all times you must demonstrate to the examiner that your geographical knowledge is greater than what is taught in class/on the specification. Therefore, complete the task for each heading. You need to include reference for at least 1 source per task. Remember Africa is a continent (!) and therefore individual countries must be referenced

**Fair Trade:** provide x2 examples of fair trade within x2 different Countries

**Health:** Describe the main types of diseases that impact x3 of your own choice of African nations

**Water cycle:** Investigate how management of the water cycle can improve agricultural techniques. Use x2 countries as examples

**Plate tectonics:** Choose a Tectonic feature in Africa and explain its' formation?

**Coastal Erosion / Flooding: Challenging perceptions! Flooding in Africa, really!**

Describe how sea level rises impact on x3 areas of the continent

### Perception of place:

Choose a country and research how it is perceived throughout the world.

**State Fragility:** Look at the map, describe and explain the global a pattern.
